

PIV

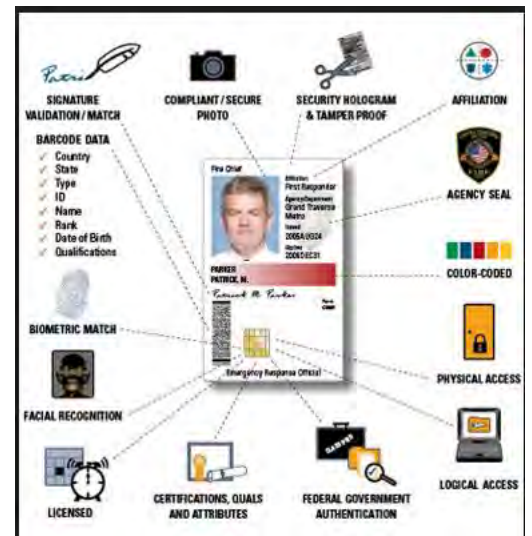

Part No: MA-PIV

Use United States Government Smart Cards to Process Visitors

PassagePoint’s integration with Codebench PIVCheck® provides a solid, three-step authentication process that is ideal for government visitor management applications.

Features & Benefits

- Extracts cardholder data from any PIV, TWIC, FRAC or CAC card.
- Validates the cardholder’s PIN.
- Completes on -card biometric matching.
- Digital certificates are verified using the issuer’s certificate authority, SCVP, OCSP responder/repeater or the TSA hot list (TWIC cardholders).
- All cards are validated using the FIPs -201 challenge -response protocol in order to identify forged or cloned cards.
- Perfect solution for US government agencies and contractors.
